

Indian website on biotechnology launched

Biotech Support Services, India, has launched a website which provides information about biotech companies research institutes, resources, services, educational facilities, literature, journals, news and events, suppliers, culture collections, etc. The website gives information about the above areas from India and other parts of the world. Nearly 400 companies from abroad, 150 Indian companies, 200 research institutes from India, 100 research institutes from around the world, 190 journals, 50 educational institutes from other parts of the world, 20 selected articles, consultants etc. are listed on the website.

'Biotechnology' offers processes, which are simple, economical, eco-friendly, less energy consuming and occur at ambient temperature, pressure and as such are less hazardous. Bioconversion and biotransformation are the keywords to success today. In India, although biotechnology is in the infant stage, awareness is growing. *Contact: Internet: <http://www.biotechsupportindia.com>.* (Chemical Weekly, 29 February 2000)
