

New enzyme products

Biocatalysts Ltd., the United Kingdom, has developed a variety of enzyme-based products as replacements for potassium bromate (Combizyme C359P) and sodium metabisulphide (Combizyme C366P and Combizyme C485P). These GMO-free enzyme replacements can provide crucial process alternatives to bakers in Europe, where new legislations have standardized additive regulations.

Name	Principal Activities	Application Notes
Combizyme 359P	Pentosanase	Bromate replacer
Combizyme 366P	Proteinase, Pentosanase	Metabisulphide replacer in biscuits and crackers
Combizyme 485P	Amylase, Hemicellulase and Proteinase	Metabisulphide replacer in biscuit manufacture
