

## **Milk analyser**

Shree Kamdhenu Electronics Pvt. Ltd., India, offers an innovative and low-cost equipment for analysing the composition of milk. The Akashganga milk analyser (AMA) takes just under 45 seconds to determine density/CLR, the percentage of fat, non-fat solids, proteins and added water in milk. Based on ultrasound technology, the system can be operated using either direct electricity or battery. Outstanding features of this portable device are its non-destructive estimation of milk components and that it does not use any reagent. AMA offers user-friendly, push button, walk away protocol and it can be cleaned using water. *Contact: Mr. Sulax Shah, Shree Kamdhenu Electronics Pvt. Ltd., Vallabhvidyanagar, Gujarat, India.
