

Sweetened coconut cream

Ampol Food Processing Ltd., Thailand, recently launched the first ready-to-serve sweetened coconut cream (SCC) in Combibloc aseptic containers. SCC had so far been an exclusively home-made product. Coconut meat is crushed to make the cream and then cooked before consumption. In order to provide the same characteristics as traditionally prepared SCC – aroma, flavour and texture – Ampol opted for aseptic packaging. Available in 250 ml and 500 ml packages, Ampol's SCC offers consistent quality and colour. *Contact: Ms. Piyarat Meksupa, SIG Combibloc, Thailand.
