

## **Pouch packaging machinery**

A.M.P. Rose, a leading manufacturer of sophisticated confectionery and packaging machinery based in the United Kingdom, is offering a total solution for pouch packaging in India. The GVB range of vertical form, fill and seal systems are fully automatic. These compact units require less power and are highly efficient. Packaging speeds up to 90 packs/min can be achieved depending on pack size, product to be packed and packaging material.

The company is also offering fully electronic multi-head weighers in configurations of 10, 12 and 14 heads to pack cereals, confectionery, nuts, snacks, chips, frozen foods, etc. at a rate of 50-90 pouches/min with an accuracy of  $\pm 5$  g. High-precision sophisticated liquid fillers, linear weighers and volumetric auger fillers with 'Servo' technology ensure the highest degree of accuracy and high speed to pack liquids and powders in pouches.
