

## Solar power for homes

Suntopway Electronics (Shenzhen) Co. of China is offering STW range of solar power systems for use in households. These units can supply power for basic needs such as lights, television, fans, etc. The STW30A-180A model incorporates amorphous silicon solar panels, while the STW 50C-200C employs monocrystalline solar panels. A maintenance-free lead-acid battery is supplied with all the models.

The company also offers a new solar home lighting kit that incorporates either a 10 W monocrystalline solar panel or a 12 W amorphous panel. A battery pack with in-built charge controller is provided with this unit. Other products available include STW-3288, a wireless solar emergency telephone system, and STW-PS1188, a mini power system for normal family lighting applications. *Contact: Suntopway Electronics (Shenzhen) Co.
