

New simulation program for solar thermal systems

Nova Energie GmbH, Switzerland, has developed a novel simulation program for dimensioning thermal solar systems. The tri-lingual program is available in English, French and German languages. Some key features of Polysun (3.3) include:

- Know-how on optimal dimensioning;
- Simulation of seasonal storage tanks;
- Collectors measured according to EN/ISO;
- Ecological balance, greenhouse savings; and
- Optimal choice of the circulation pump.
