

Eco-friendly solvents for precision cleaning

Albemarle Corporation, the United States, has developed powerful, environment-friendly solvents for precision cleaning. ABZOL cleaners are high-performance precision cleaning solvents which can be used for vapour degreasing, cold cleaning and ultrasonic cleaning. These cleaners have very low ODP and GWP. They have no flash point by either the tag closed cup or open cup methods, are easy to recycle and are compatible with metals and are less likely to cause corrosion than other solvents.

ABZOL is ideal for cleaning precision metal parts, circuit boards, electronic components, implantable prosthetic devices and optical equipment. Some benefits offered by these cleaners include:

- Outstanding solvency and cleaning;
- Fast drying;
- Excellent penetration into crevices;
- Compatible with most vapour degreasers;
- Low evaporative emissions;
- Very low acid formation;
- Can be distilled and recovered; and
- Safe to use with proper worker protection and adequate ventilation.
