

## **New air-conditioning kits**

Harvey Westbury Corp., a subsidiary of Auxer Group Inc. in the United States, has launched a new and expanded line of automotive air-conditioning chemicals, retrofit and recharge kits. The Easy Test® air-conditioning line of kits, chemicals and accessories are based primarily on HFC-134a, a replacement for ozone-depleting CFC-12. The company is also planning a new line of do-it-yourself kits, chemicals and accessories geared towards supplying the market and consumers with innovative and inexpensive solutions for recharging new cars (post 1994 models) with HFC-134a as well as retrofitting older cars from CFC-12 to alternative refrigerants. *Contact: Mr. West Paterson, Auxer Group Inc., the United States.
