RIFFAI

AI-Powered Satellite Intelligence Solutions

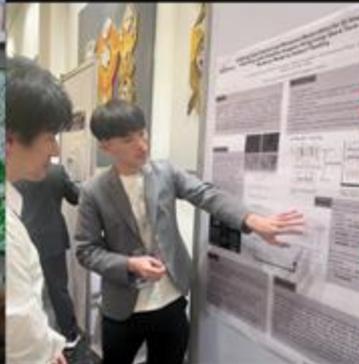

Using AI to Shorten Site Search & Selection for Energy Industry with Satellites

Presented By:

Phattharapong Duangkham

Head of Artificial Intelligence

www.riffai.org

COMPANY PROFILE

RIFFAI, a Satellite & AI company that utilizes AI technology for monitoring environmental changes in Earth Observation. Focusing on the multi-hyperspectral imaging satellite and AI in image processing and time series analysis.

Industry: Aerospace, Artificial Intelligence, Satellite

Incorporated: 2 December 2024

Headquarter: USA

Operating Countries: Singapore, Thailand, UK, USA

Subsidiaries: RIFFAI LLC, RIFFAI PTE. LTD., RIFFAI Co., Ltd., RIFFAI Limited, & RIFFAI Stars Lab Co., Ltd.

Website: www.riffai.org

Email: contact@riffai.org

A TEAM OF 15 ENGINEERS

From Satellite, AI, GIS, and Earth Observation

Kolatat Katousano
 Founder & Chief Executive Officer

Satellite Data Engineer + GIS Specialist
 (Ex-Schneider Electric & Ex-Google Earth Katalyst Fellow)

Pojchara Ounjaroen

Co-Founder & Chief Operating Officer

Energy Engineer + Research Fellow at Stanford University

(Ex-PTTEP & Ex-Fellow at Stanford Geo-Thermal Programme)

Wen-Ming Wong
 Chief Strategy Officer

Thaninrath Thiraphotiwat
 Chief Technology Officer

Suchada Hnoonpakdee
 Chief Product Officer

Puthiphat Jirawatanaphalin
 Chief Representative

Phattharapong Duangkham
 Head of Artificial Intelligence

EXECUTIVES

ADVISORS

Nicholas Seow
 Growth Advisor

Imran Zawwar
 Strategy Advisor

PROBLEM & POLICY

Challenges & Opportunities

PROBLEM

150K Energy Employers

71% Energy employers struggling to find talent to match demand Globally

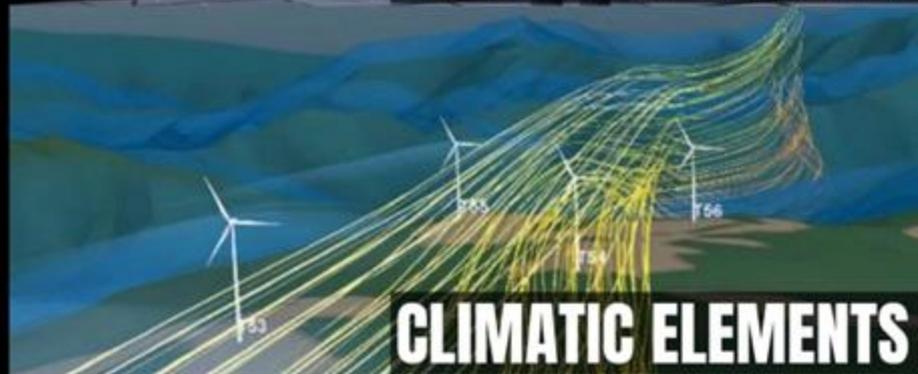

14 Billion USD

In 2025, clean energy projects canceled or delayed in the U.S.

81% of projects

failed since sites couldn't meet the weather & geometric elements.

Source: Reuters & Forbes & World Economic Forum

POLICY

130 Countries

- Tripling global renewable energy capacity by 2030
- Doubling the annual rate of energy efficiency improvements by 2030

45 % by 2030

- Aiming to raise renewable electricity share in regional action plans.
- Accelerating the region's clean energy transition and strengthen cooperation.

51 % by 2037

- Thailand targets 51% of total generation by 2037 (up from 20% in 2023)
- Prioritizing Solar, Wind, Biomass, and Waste.

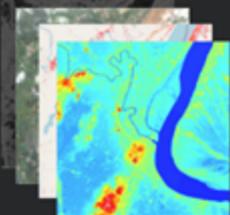

TECHNOLOGY

Satellite & AI & Tech

SOLUTION

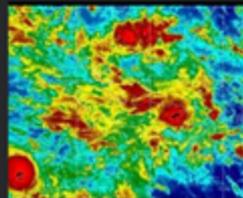

MULTISPECTRAL SATELLITE IMAGERY

- VHR RGB Imagery
- Solar radiation index
- Digital elevation
- Radar-based satellite
- Building data

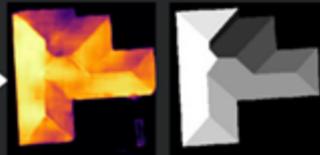

WEATHER DATA

- Heat Index
- Wind Chill Index
- UV Index (UVI)
- Lifted Index (LI):
- Showalter Index (SI)
- Convective Available Potential Energy (CAPE)

RESULT

Geometry-to-Yield Conversion

ENERGY PROJECTION

Spatiotemporal Feature Fusion

Remote Sensing Feature Extraction

Distributed Energy Potential Estimation

GLOBAL BUILDING ATLAS MODEL

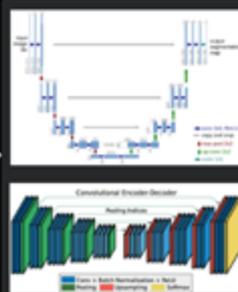

The Global Building Atlas (GBA)D map of nearly all 2.75 billion buildings on Earth, including their footprints, heights, and simplified 3D models (Level of Detail 1)

Geospatial Prior Injection

SEGMENTATION MODEL

- Semantic Segmentation
- Instance Segmentation
- Fully Convolutional Networks (FCNs)
- Activation Layers

SOLAR FARM SEGMENTATION

Structural Surface Identification

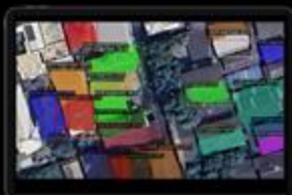

ROOFTOP SEGMENTATION

SATELLITE & AI DEVELOPMENT

FOREVER CHANGE
THE WAY WE WORK
WITH INFORMATION

100x Faster Intelligence
680x More Cost Effective
No Hardware No Permit
Global Coverage

RENEWABLE ENERGY ON WIND & SOLAR

SECURED COMPANIES

Type: Renewable Energy

Mission: Site Search & Selection

Report: Qualified Leads & Automation

ON-GOING DISCUSS COMPANIES

Automating Search for Area Deployment

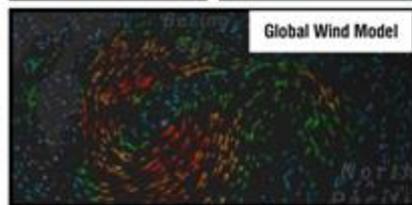

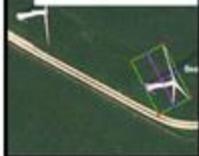

For cost efficient & lean on site operations

Area Segmentation

Site Monitoring

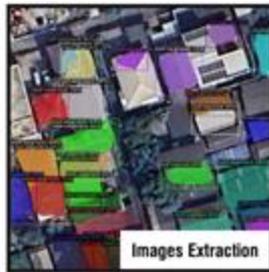

Remote Full Feasibility Support & Insight

Wind projects, due to their **environmental** sensitivity and **regulatory** complexity, may require **several months to years** for comprehensive site evaluation, permitting, and community engagement.

Automating Search for Solar Installation

For faster leads and sales cycle in energy

Solar Panel Detection

Area Quantification

Saving time and cost in Site Searching

The initial **site search and information gathering phase** can take about **25-30 hours** on average in residential projects and more in commercial projects from **40 - 80 hours** with even limited options.

RIFFAI

AREA OF COLLABORATION

How we can win this together

RIFFAI リファイ

RIFFAI is AI and satellite technology monitoring the infrastructure by using spectral-image processing and time series analysis solutions.

X

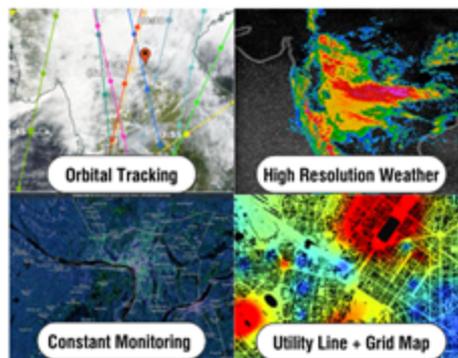

COLLABORATION

- **Commercial / Enterprise:**
 - *Commercial scale*
 - *Market access*
 - *Turnkey Solutions*
 - *Data or APIs*
- **Research / University**
 - *Scientific validation*
 - *Joint research*
 - *Cross-licensing*
 - *IPs co-development*

AREA OF COLLABORATION

Components and Technology Partnership with Satellite Manufacturing + Data

SATELLITE DATA X AI

Satellite x AI Intelligence

RIFFAI is developing advanced AI models that processed on satellite data and imagery

- Energy (Renewable + Exploration)
- Environment (Agriculture + Carbon)
- National Security (Disaster + Defence)

ENERGY + SATELLITE + AI

Planetary Feasibility
off-Site

Processing Model in
Images and Data

International
Cooperation
